Additional Information

Tips For Observing Butterflies

Look for adult butterflies on flowers, on pavement and on damp dirt. Approach the butterflies slowly and try not to move your hands too quickly gesturing or pointing. Use your voice instead; it will not frighten the butterfly. Wait until everyone in your group has seen the butterfly before you try to photograph it. Look for butterfly eggs and caterpillars on the leaves and flowers of plants.

Tips for Photographing Butterflies

It is easier to photograph butterflies early in the morning when they are cool. Use a flash if possible to give greater detail. Use different angles to get different views of the wings. Start from a few feet away and move in closer with each photo.

About ATBI

This brochure was compiled and developed by the All Taxa Biodiversity Inventory (ATBI) group. ATBI is an on-going project in Tennessee State Parks and State Natural Areas. The goal of ATBI is to document all species in Tennessee State Parks, monitor long-term trends in specific taxonomic groups, and promote education about and preservation of all biodiversity with increased science and citizen education efforts. To access the ATBI database, go to www.state.tn.us/environment/parks/atbi.

For more information about ATBI, please contact David R. Hill, 7th Floor, L & C Tower, 401 Church St., Nashville, TN 37243. Email david.r.hill@state.tn.org. Phone 615-532-253-2455.

Welcome to the wonderful world of butterflies at beautiful Burgess Falls State Natural Area! Of the approximate 135 species of butterflies in Tennessee, 32 have been documented in this park.

Above is a picture of a Zebra Swallowtail, the state butterfly of Tennessee. Mrs. Sherrill Charlton and her biology students at Gallatin High School led the way to name the Zebra Swallowtail the state butterfly by researching the species that have been documented in Tennessee. They chose the Zebra Swallowtail because it is abundant in the South, and the caterpillars only feed on the leaves of pawpaw (*Asimina triloba*), a native tree found throughout Tennessee.

The class contacted their state senator, Don Wright, who initiated a bill in January 1994. The Tennessee legislature discussed and passed the bill, and the Zebra Swallowtail became the official state butterfly of Tennessee on May 9, 1994.

Butterfly Checklist of Burgess Falls State Natural Area

Swallowtails	☐ Northern Pearly-eye	
☐ Pipevine Swallowtail	☐ Gemmed Satyr	Habitat
☐ Zebra Swallowtail	☐ Carolina Satyr	Burgess Falls State Natural Area is located on the Eastern Highland Rim adjacent to the Cumberland Plateau. There are bluffs,
☐ Eastern Tiger Swallowtail	☐ Monarch	
☐ Spicebush Swallowtail		ridges, streams and four waterfalls—all a
	Skippers	part of the Falling Water River landscape. Abundant forests surround the park.
Whites & Sulphurs	☐ Silver-spotted Skipper	The distance of the particular and particular particula
